

Namespace Fl.Shared.Utils.Components. Logging.Extensions.Builder Classes

[LoggingWebApplicationBuilderExtensions](#)

Class

LoggingWebApplicationBuilderExtensions

Namespace: [Fl.Shared.Utils.Components.Logging.Extensions.Builder](#)

Assembly: Fl.Shared.Utils.Components.dll

```
[ExcludeFromCodeCoverage(Justification = "static extension methods")]  
public static class LoggingWebApplicationBuilderExtensions
```

Inheritance

[object](#)  ← LoggingWebApplicationBuilderExtensions

Inherited Members

[object.Equals\(object\)](#)  , [object.Equals\(object, object\)](#)  , [object.GetHashCode\(\)](#)  ,
[object.GetType\(\)](#)  , [object.MemberwiseClone\(\)](#)  , [object.ReferenceEquals\(object, object\)](#)  ,
[object.ToString\(\)](#) 

Methods

AddSerilogLogging(WebApplicationBuilder)

```
public static WebApplicationBuilder AddSerilogLogging(this  
WebApplicationBuilder builder)
```

Parameters

builder [WebApplicationBuilder](#) 

Returns

[WebApplicationBuilder](#) 

Namespace Fl.Shared.Utils.Components. Logging.Extensions.Either Classes

[EitherLoggingExtensions](#)

Class EitherLoggingExtensions

Namespace: [Fl.Shared.Utls.Components.Logging.Extensions.Either](#)

Assembly: Fl.Shared.Utls.Components.dll

```
public static class EitherLoggingExtensions
```

Inheritance

[object](#)  ← EitherLoggingExtensions

Inherited Members

[object.Equals\(object\)](#)  , [object.Equals\(object, object\)](#)  , [object.GetHashCode\(\)](#)  ,
[object.GetType\(\)](#)  , [object.MemberwiseClone\(\)](#)  , [object.ReferenceEquals\(object, object\)](#)  ,
[object.ToString\(\)](#) 

Methods

TeeLog<T>(EitherAsync<Error, T>, ILogger, string)

```
public static EitherAsync<Error, T> TeeLog<T>(this EitherAsync<Error, T> value,  
ILogger logger, string componentName)
```

Parameters

value EitherAsync<Error, T>

logger ILogger

componentName [string](#) 

Returns

EitherAsync<Error, T>

Type Parameters

T

TeeLog<T>(EitherAsync<Error, T>, ILogger, string, params object[])

```
public static EitherAsync<Error, T> TeeLog<T>(this EitherAsync<Error, T> value,
ILogger logger, string template, params object[] parameters)
```

Parameters

value EitherAsync<Error, T>

logger ILogger

template [string](#)

parameters [object](#)[]

Returns

EitherAsync<Error, T>

Type Parameters

T

TeeLog<T>(Either<Error, T>, ILogger, string)

```
public static Either<Error, T> TeeLog<T>(this Either<Error, T> value, ILogger
logger, string componentName)
```

Parameters

value Either<Error, T>

logger ILogger

componentName [string](#)

Returns

Either<Error, T>

Type Parameters

T

TeeLog<T>(Either<Error, T>, ILogger, string, params object[])

```
public static Either<Error, T> TeeLog<T>(this Either<Error, T> value, ILogger  
logger, string template, params object[] parameters)
```

Parameters

value Either<Error, T>

logger ILogger

template [string](#) 

parameters [object](#) []

Returns

Either<Error, T>

Type Parameters

T

Namespace Fl.Shared.Utils.Components. Logging.Extensions.Error

Classes

[ErrorExtensions](#)

Class ErrorExtensions

Namespace: [Fl.Shared.Utls.Components.Logging.Extensions.Error](#)

Assembly: Fl.Shared.Utls.Components.dll

[object.GetType\(\)](#)  , [object.MemberwiseClone\(\)](#)  , [object.ReferenceEquals\(object, object\)](#)  ,
[object.ToString\(\)](#) 

Methods

ToLoggingAction(Error, ILogger, string)

```
public static Action ToLoggingAction(this Error err, ILogger logger,  
string componentName)
```

Parameters

err Error

logger ILogger

componentName [string](#) 

Returns

[Action](#) 

ToLoggingAction(Error, ILogger, string, params object[])

```
public static Action ToLoggingAction(this Error err, ILogger logger, string
template, params object[] parameters)
```

Parameters

err Error

logger ILogger

template [string](#) 

parameters [object](#) []

Returns

[Action](#) 

Namespace Fl.Shared.Utils.Components. Logging.Extensions.HostBuilder Classes

Methods

ConfigureDefault(LoggerConfiguration)

```
public static LoggerConfiguration ConfigureDefault(this LoggerConfiguration config)
```

Parameters

config LoggerConfiguration

Returns

LoggerConfiguration

ConfigureDefault(LoggerConfiguration, SerilogConfiguration)

```
public static LoggerConfiguration ConfigureDefault(this LoggerConfiguration config,  
SerilogConfiguration cfg)
```

Parameters

config [LoggerConfiguration](#)

cfg [SerilogConfiguration](#)

Returns

[LoggerConfiguration](#)

ConfigureDefault(LoggerConfiguration, LogEventLevel)

```
public static LoggerConfiguration ConfigureDefault(this LoggerConfiguration config,
LogEventLevel level)
```

Parameters

config [LoggerConfiguration](#)

level [LogEventLevel](#)

Returns

[LoggerConfiguration](#)

ConfigureDefault(LoggerConfiguration, LogEventLevel, IDictionary<string, LogEventLevel>)

```
public static LoggerConfiguration ConfigureDefault(this LoggerConfiguration config,
LogEventLevel level, IDictionary<string, LogEventLevel> overrides)
```

Parameters

config [LoggerConfiguration](#)

level [LogEventLevel](#)

overrides [IDictionary](#) [<string, LogEventLevel>](#)

Returns

LoggerConfiguration

Namespace Fl.Shared.Utils.Components. Logging.Models

[object.ToString\(\)](#) 

Methods

AddTraceLogContext(IServiceCollection)

```
public static IServiceCollection AddTraceLogContext(this IServiceCollection  
services)
```

Parameters

services [IServiceCollection](#) 

Returns

[IServiceCollection](#) 

Namespace Fl.Shared.Utils.Components. Web.Models

Classes

[ErrorResponse](#)

[RoutingConfiguration](#)

[ServiceDescription](#)

Class ErrorResponse

Namespace: [FI.Shared.Utils.Components.Web.Models](#)

Assembly: FI.Shared.Utils.Components.Web.Models.dll

```
public record ErrorResponse : IEquatable<ErrorResponse>
```

Inheritance

[object](#)  ← ErrorResponse

Implements

[IEquatable](#)  <[ErrorResponse](#)>

Inherited Members

[object.Equals\(object\)](#)  , [object.Equals\(object, object\)](#)  , [object.GetHashCode\(\)](#)  ,
[object.GetType\(\)](#)  , [object.MemberwiseClone\(\)](#)  , [object.ReferenceEquals\(object, object\)](#)  ,
[object.ToString\(\)](#) 

Constructors

ErrorResponse(string)

```
public ErrorResponse(string Message)
```

Parameters

Message [string](#) 

Properties

Message

```
public string Message { get; init; }
```

Property Value

Class RoutingConfiguration

Namespace: [Fl.Shared.Utils.Components.Web.Models](#)

Assembly: Fl.Shared.Utils.Components.Web.Models.dll

`[ExcludeFromCodeCoverage]`

```
public record RoutingConfiguration : IEquatable<RoutingConfiguration>
```

Inheritance

[object](#)  ← RoutingConfiguration

Implements

[IEquatable](#)  <[RoutingConfiguration](#)>

Inherited Members

[object.Equals\(object\)](#)  , [object.Equals\(object, object\)](#)  , [object.GetHashCode\(\)](#)  ,
[object.GetType\(\)](#)  , [object.MemberwiseClone\(\)](#)  , [object.ReferenceEquals\(object, object\)](#)  ,
[object.ToString\(\)](#) 

Fields

Default

```
public static readonly RoutingConfiguration Default
```

Field Value

[RoutingConfiguration](#)

Properties

PathBase

```
public string PathBase { get; init; }
```

Property Value

[string](#)

Class ServiceDescription

Namespace: [FI.Shared.Utils.Components.Web.Models](#)

Assembly: FI.Shared.Utils.Components.Web.Models.dll

`[ExcludeFromCodeCoverage]`

```
public record ServiceDescription : IEquatable<ServiceDescription>
```

Inheritance

[object](#)  ← ServiceDescription

Implements

[IEquatable](#)  <[ServiceDescription](#)>

Inherited Members

[object.Equals\(object\)](#)  , [object.Equals\(object, object\)](#)  , [object.GetHashCode\(\)](#)  ,
[object.GetType\(\)](#)  , [object.MemberwiseClone\(\)](#)  , [object.ReferenceEquals\(object, object\)](#)  ,
[object.ToString\(\)](#) 

Properties

Name

```
public string Name { get; init; }
```

Property Value

[string](#) 

Version

```
public string Version { get; init; }
```

Property Value

[string](#) 

Namespace Fl.Shared.Utils.Mappers

Classes

[DataHttpContentMapper<T>](#)

Interfaces

[IApiResponseMapper<T>](#)

[IMapper<T1, T2>](#)

Class DataHttpContentMapper<T>

Namespace: [FI.Shared.Utils.Mappers](#)

Assembly: FI.Shared.Utils.Mappers.dll

```
public class DataHttpContentMapper<T> : IApiResponseMapper<T>, IMapper<Option<T>,
    IResult>, IMapper<Error, IResult>
```

Type Parameters

T

Inheritance

[object](#)  ← DataHttpContentMapper<T>

Implements

[IApiResultMapper](#)<T>, [IMapper](#)<Option<T>, [IResult](#) >, [IMapper](#)<Error, [IResult](#) >>

Inherited Members

[object.Equals\(object\)](#) , [object.Equals\(object, object\)](#) , [object.GetHashCode\(\)](#) ,
[object.GetType\(\)](#) , [object.MemberwiseClone\(\)](#) , [object.ReferenceEquals\(object, object\)](#) ,
[object.ToString\(\)](#) 

Methods

Map(Error)

```
public IResult Map(Error item)
```

Parameters

item Error

Returns

[IResult](#) 

Map(Option<T>)

```
public IResult Map(Option<T> item)
```

Parameters

item Option<T>

Returns

[IResult](#)

Interface IApiResultMapper<T>

Namespace: [Fl.Shared.Utils.Mappers](#)

Assembly: Fl.Shared.Utils.Mappers.dll

```
public interface IApiResultMapper<T> : IMapper<Option<T>, IResult>,
IMapper<Error, IResult>
```

Type Parameters

T

Inherited Members

[IMapper<Option<T>, IResult>.Map\(Option<T>\)](#), [IMapper<Error, IResult>.Map\(Error\)](#)

Interface IMapper<T1, T2>

Namespace: [Fl.Shared.Utls.Mappers](#)

Assembly: Fl.Shared.Utls.Mappers.dll

```
public interface IMapper<in T1, out T2>
```

Type Parameters

T1

T2

Methods

Map(T1)

```
T2 Map(T1 item)
```

Parameters

item T1

Returns

T2
